

## ADVERTISING INFORMATION – EDUCATIONAL ESTABLISHMENT AT LOT 328 MULLIGANS LAGGON ROAD, KUNUNURRA

The facility in question is a rural training centre designed to provide valuable skills to individuals who have completed their education and are seeking employment opportunities. The target age group encompasses anyone who is no longer in school and wishes to acquire practical skills that will enhance their employability.

Participants will be referred to the training facility through Job Pathways, KGT, or KREAC, which are organizations dedicated to facilitating employment pathways. All courses offered at the facility will be nationally accredited, ensuring that participants receive recognised qualifications upon completion.

KREAC, in collaboration with a Registered Training Organization (RTO), will be responsible for delivering the training programs. The RTO will provide experienced trainers, deliver the training modules, and issue certificates of attainment to successful participants.

Operating hours for the facility are expected to be from approximately 7:30 am to 2:30 pm, four days a week, subject to weather conditions. The facility aims to provide a realistic training environment that simulates real-life scenarios, allowing participants to gain practical skills relevant to the courses offered.

The training programs at the facility will cover various areas. For instance, Pastoral Training will include courses on cattle handling, horsemanship, tractor operation, basic mechanics, basic welding, and first aid. Additionally, the facility will offer programs in Civil Construction, covering training on operating heavy machinery such as graders, loaders, backhoes, skid steers, and trucks.

While the primary focus initially lies on skill-based training, the facility plans to incorporate a tourism aspect in the future. This could involve wilderness awareness programs, educating participants about bush tucker (edible native plants), poisonous creatures, night navigation, and fostering respect for the environment.

Access to the facility is available via Mulligans Lagoon Road, with access being subject to weather and road conditions. This ensures that participants can reach the training centre safely and conveniently, provided the conditions permit.
