Hi Marlene

Can the Race Club please request a change of project for their community grant funding? We would like the funding now to go towards automatic retic for our track.

These reason for the change is the power upgrade will now be taken care of with the 2028 solar eclipse funding with the shire. The reason we would like the facilities grant to go towards automatic retic is as per below:

- We are the only turf track north of Geraldton. This gives us a point of difference from Broome and Darwin
- Currently our track is watered manually by a volunteer
- The current process for watering is
 - Drive around the track and turn 3 sets of sprinklers on at a time
 - Every 30-60min go back and turn next set on and previous set off
 - During the dry season this watering process happens 3 times a week
 - Watering the track can vary from 2.5-10hrs each water pending on conditions
- If we can automate our watering we can invest our volunteer power into improving other areas of the club and also avoid volunteer burnout

If you would like further justification let me know.

Many thanks

Chels

Chelsea Kenny
